

PIYUSH PANBUDE

Freelance Web Developer · Founder, NextWave

Mumbai, India | +91 9321881100 | piyushpanwar2107@gmail.com | github.com/naadme | linkedin.com/in/piyush-panbude

PROFILE

Freelance web developer building premium, high-performance websites for startups and brands. Focused on modern UI, responsive design, and polished interaction detail — from first pixel to final deploy — using AI-assisted workflows to move fast without sacrificing code quality.

EXPERIENCE

Founder — NextWave 2026 – Present

- Design and build custom websites end-to-end for startups and small businesses, owning UI, UX, frontend development, and client communication.
- Partner directly with clients to translate brand identity and business goals into premium, conversion-focused web experiences.
- Deliver full projects independently — from initial design concepts through responsive frontend builds and final deployment.

Marketing Intern / Graphic Designer — SeeAdler Media Nov 2025 – Dec 2025

- Produced social media creatives and marketing assets for client campaigns, maintaining brand consistency across deliverables.
- Collaborated with the marketing team to develop on-brief brand content under tight turnaround times.

SELECTED PROJECTS

NextWave — Agency Landing Page Framer Motion · React

- Designed a premium agency landing page with strong typographic hierarchy and refined micro-interactions to establish brand credibility.

Hindustan Courier & Cargo Services React · Responsive Web

- Built a responsive business website with a shipment tracking interface, positioning the brand as professional and reliable to prospective clients.

Chawala Dental Clinic Responsive Web

- Developed a trust-focused healthcare website with an appointment booking flow, designed to convert visitors into scheduled patients.

EarringQueen React · E-Commerce

- Built a jewelry e-commerce site with product browsing, a wishlist feature, and a WhatsApp-based enquiry flow suited to the brand's sales process.

Apex — Fitness Tracking App React Native · Firebase · In Development

- Building a mobile fitness tracking app with Firebase authentication, an achievements system, and a premium dashboard UI.
